^{*2023} Actuals (\$) unaudited

Includes Roads, Parks, Public Works, and Corporate Assets

Operations

- **Note 1:** Includes a 2.25% blended OPSEU COLA per collective, and a non-union increase of 1.78% consistent with IBEW collective agreement. Statutory and group benefit premiums increased to reflect current benefit rates.
- Note 2: Fuel budget adjusted based on prior year actuals and expected 2025 pricing.
- Note 3: Adjusted interdepartmental allocation for costs shared by the corporation, based on proportional share of the annual budget.
- Note 4: Adjusted interdepartmental allocation for corporate services, based on proportional share of the annual budget.
- Note 5: Materials and Supplies budget adjusted based on prior years actual spend.
- Note 6: Professional & Contracted Services budget adjusted based on prior years actual spend and anticipated 2025 initiatives.
- **Note 7:** Transfer to Capital Infrastructure Reserve increased in accordance with recommendations of the 2024 AMP. Additional year-end surplus transfers will be required to achieve the recommended 3% annual tax increase to tax-supported reserves.
- Note 8: Decreased hydro and natural gas budgets based on 2023 actuals.

| Project Description | Replace the existing glass doors to Council Chambers. | | | | |
| Why is this project important? | Council often goes into Closed Session for confidential items. When this occurs a sign is placed on the doors to advise residents. The problem is that the glass doors offer very little sound proofing. There are gaps around the doors making it very easy for anyone waiting in the lobby to hear the conversations. This problem has been exacerbated since electronic participation is permitted in that if a Council Member is attending remotely, microphones are required. Also, there is AV equipment in Chambers that should be protected by having the doors lock. The Chambers is also used during Elections as the Voter Assistance Centre complete with many laptops that need to be secure. | | | | |
| What are the consequences of not doing this project? | | nd sensitive discussions could be heard by the general public. if we don't have the proper measures in place to ensure Closed | | | |

| Project Description | The current contract involving our Telematics equipmeterm in Q2 2025. Currently the Town uses two separatequipment and our heavy duty snow removal fleet. Townships to one software is ideal. | ate telematics programs for light duty/non snow | removal | |
| Why is this project important? | Telematics in plow trucks plays a crucial role in maint several reasons: | taining Ontario's Minimum Maintenance Standar | ds (MMS |) for |
| | Real-Time Monitoring: Telematics systems provide remunicipalities to monitor snow removal operations reaccording to MMS requirements. Efficient Resource Allocation: By tracking the moven routes and deployment. This ensures that resources costs while maintaining the required standards. Improved Safety: Telematics can monitor driver behavingly maintenance. This reduces the risk of accident conditions during winter. Data Collection and Reporting: Telematics systems of purposes. This data helps municipalities demonstrate legal protection and public accountability. Enhanced Decision-Making: The data gathered from | more effectively, ensuring that all areas are service ment and activity of plow trucks, telematics helps are used efficiently, reducing fuel consumption a avior and vehicle conditions, promoting safer driets and breakdowns, which is essential for maintain collect valuable data that can be used for reporting that they are meeting MMS standards, which is telematics can be analyzed to improve decision- | in optim nd opera ving pract ning safe ng and co importar | izing tional tices and road mpliance nt for rocesses. |
| | For example, it can help identify areas that require moperations. By integrating telematics into plow trucks, municipal enhancing road safety and operational efficiency dur | ities can ensure they meet MMS standards more | | |

| What are the consequences | Legal Liability: Without compliance, municipalities are at a higher risk of legal claims and lawsuits. They may not have |
|----------------------------|--|
| of not doing this project? | the statutory defense provided by MMS, leading to potential financial penalties and legal costs. |
| | Increased Accidents: Non-compliance can result in poorly maintained roads, increasing the likelihood of accidents and |
| | injuries. This can lead to higher insurance claims and costs. |
| | Public Dissatisfaction: Failing to meet maintenance standards can erode public trust and satisfaction. Residents expect |
| | safe and well-maintained roads, and non-compliance can lead to complaints and a negative public image. |
| | Operational Inefficiencies: Without adherence to MMS, maintenance operations may become inconsistent and |
| | inefficient, leading to higher operational costs and resource wastage. |

| Project Description | The Mobile or Trailer-Mounted Digital Sign Board proje a trailer. This sign board can be deployed during emerg information to the public. Its mobility allows for flexible critical, ensuring that the community remains informed | encies, road closures, or town events to prove placement at key locations where dynamic of | ide real-tii | me |
| Why is this project important? | A mobile digital sign board is an essential tool for enhancing public communication during emergency situations, such as natural disasters or road closures, where rapid, clear messaging is required. It can also serve as a valuable asset during town events, helping to manage traffic, provide directions, and promote activities. The ability to relocate the sign to various locations ensures it can be used in multiple scenarios, maximizing its utility. The sign's cloud-controlled system allows for real-time updates, ensuring that information remains accurate and relevant. | | | |
| What are the consequences of not doing this project? | Without a mobile or trailer-mounted digital sign board, the town's ability to communicate important information in emergency or high-traffic situations will be limited. This could result in public confusion during emergencies, road closures, or events, potentially compromising public safety or causing logistical issues. Additionally, the lack of a flexible, portable communication tool may reduce the effectiveness of event management and diminish the overall quality of public service communications. | | | |

| | | | | | |
| Project Description | This project will deliver an integrated Parks, Trails and | Recreation Master Plan for the Town of Midland. | | | |
| Why is this project important? | The current Parks and Trails Master Plan was based on 2018 (adopted in 2019), and the last Recreation Master Plan was completed in 1993. Master plans are an important tool to ensure that recreation facilities and outdoor recreation infrastructure (including sports fields and courts, parks and trails) meet the current and future demands of the Town. They establish a long-term vision, with input from the community, that guide the development, maintenance and operations of recreation assets, programs and services. Master plans that are current can also strengthen grant applications, encourage sponsorship and partnership opportunities, and inform development charge studies. Overall, master plans are essential for creating sustainable, inclusive, and well-supported recreational systems that enhance | | | | |
| NATIONAL CONTRACTOR OF THE CON | community well-being | | | | |
| What are the consequences | • | the age of the previous one. Neighbouring municipalities have | | | |
